ARROW T50 ELITE STAPLE GUN

The best known industrial quality staple gun is likely to be the US-made Arrow T50, having sold over 50 million units since its introduction in the 1950s. Now Arrow have upgraded the T50 with the release of the T50 Elite Manual Staple Gun.

The new model features a more ergonomic design with a shaped lever handle and soft rubber grip.

It will fire both staples (T50 6-14mm) and brad nails (18 gauge up to 25mm). There is a high/low power setting and the model incorporates Arrow's patented easy-squeeze drive technology.

Arrow manual, electric and cordless tools and consumables are available from Total Tools stores nationally.

ADJUSTABLE LEGS

LEGGZ have added to their range of wooden, metal, plastic and caster legs with an adjustable round metal leg.

The 60mm dia. leg is available in chrome, white or black and is adjustable from 150mm to 175mm. Each leg has a load capacity of 80kg and comes with a mounting plate and screw supplied.

Available from Bunnings Warehouse, the new adjustable round LEGGZ offer a solution for new projects, the replacement of existing furniture legs and the installation of furniture on uneven floors.
