**Commercial steam cleaner delivers long operating time**

With its chemical-free, antibacterial qualities, steam has a long history of application in high-hygiene environments. The Karcher DE 4002 produces 6,000 litres of steam for five hours of continuous cleaning work without having to refill. The unit comes with a variety of accessories and safety features including a splash-proof control handle with dead-man switch; automatic heat cut-off; and intelligent water level indicators. Steam cleaning is ideal for kitchens, sanitary facilities, hard and resilient floors, windows, fittings and equipment.

**Removing microscopic waste from rough surfaces**

Tiled, non-slip and other rough surfaces, which are havens for microscopic waste build-up, present significant difficulties when trying to achieve optimum hygiene. For hospitals and other environments where hygiene is a top priority, a specialist scrubber drier is a necessity. The Karcher BR 30/4 C is a highly manoeuvrable, easy to use, professional-grade solution with a microfibre roller capable of picking up and holding the finest of particles and microbes from any surface.
